

Postgraduate Seminars 2019 - Part 2

Date Tuesday 1-2pm	Speaker	Title
25 June 2019	Adrian Walker	The impact of uncertainty in the exploration/exploitation trade-off.
2 July 2019	Richard Nguyan Nicole Ee	'Investigating Top-Down Guidance for Face Learning' Social Engagement, Wellbeing and Cognition: what we still do not know
9 July 2019	Sylvia Harmon Jones Jenny Le	The effect of maternal separation on social buffering of fear "Kicking the habit: Can attention be a habit that biases decision-making?"
16 July 2019	Hannah Gutmann Gabriella Rudman	Hyperarousal and intrusive memories. The role of predictions in shaping phenomenological and electrophysiological properties of audition."
23 July 2019	Annaliese McGavin Michaela Filipcikova	The Power of a Feeling: How to harness and improve intuition to make better decisions Decision Making after TBI'.
6 August 2019	Alice Kesby	Identifying and Testing Novel Psychological and Pharmacological Targets in the Treatment of Anxiety in Anorexia Nervosa
13 August 2019	Emma Bryant Angela Liang	The role of Fibroblast Growth Factor-2 in anxiety and stress responses Early musical training and language processing in adult bilinguals.
20 August 2019	Halle Quang Marco Valerio	Apathy following traumatic brain injury: Cross culture evidence in Australia and Vietnam. The Ritual of Placebo"
27 August 2019	Rebecca Tyler Mariam Younan	'Understanding superior face identification in real world tasks'. 'What makes an expert persuasive? Examining and improving juror evaluations'.

3 Sept 2019	Samantha Tang	The effect of motherhood on the extinction of learned fear
10 Sept 2019	Victor Perrone De Lima Varela Sandra Lagoter	"Classifying human face matching performance with linear modelling of eye-tracking data" The eyes have it: Eye-movements and decision-making.
17 Sept 2019	Sandersan Onie	Attentional Bias in Anxiety: Investigations using the Dot Probe and Emotion-Induced Blindness
24 Sept 2019	Marcus Wicken	"Visual mental imagery and emotion: Insights from Congenital Aphantasia."
1 October 2019	James Peak	The role of dorsal striatal output pathways in goal-directed learning
8 October 2019	Aba Szollosi	Do people learn probabilities in uncertain environments?
15 October 2019	Constance Peng	"Worse than expected: midbrain dopamine neurons as a punishment signal"
22 October 2019	Yuke Chen Kevin Tsang	Exploring the role of affective control in adolescent mental health across longitudinal cohorts". "Audiovisual Environment Perception in Virtual Reality".
29 October 2019	Emma Doolan	Interpretive Biases and Interpersonal Attachments.
5 November 2019	Joel Hoffman	Moral Injury in Traumatized Refugees
12 November 2019	Wenting Chen Byron Crimmins	Relating to objects and people: Investigating the relationship between hoarding and empathy The role of basal forebrain cholinergic neurons in stabilising fear memory.
19 November 2019	Madelyne Bisby	"Fear extinction during adolescence: neural mechanisms and implications for treating anxiety disorders"
26 November 2019	Thomas Pace Jodie Pestana	Dissociating mental imagery and perception: The opposing effects of imagined and perceptual stimuli on visual adaptation" 'The impact of motherhood on estrous cycle effects in unlearned fear'
